

# **Bidder Information Session January 28, 2021**

## **The Dayton Power and Light Company's Competitive Bidding Process for SSO Supply Procurement**

**Auction Date: March 22, 2021**

**Delivery Period: June 1, 2021 – May 31, 2022**

# Introduction

---

## Welcome to this bidder information session for the Dayton Power and Light Company's Competitive Bidding Process (CBP)

- The Dayton Power and Light Company ("DP&L") serves over 530,000 customers in 24 counties
- The CBP is designed to procure full requirements service for SSO Customers of the Dayton Power and Light Company ("Standard Service Offer Load" or "SSO Load")
  - Load not being served by a Competitive Retail Electric Service ("CRES") Provider
  - Excludes Percentage of Income Payment Plan ("PIPP") Customers
  - Winning bidders will assume all responsibilities of a PJM Load Serving Entity ("LSE"), with the exception of procurement to meet any applicable state renewable energy requirements
- Auction date is March 22, 2021
- Delivery period is June 1, 2021 through May 31, 2022
- Presentation is being made by representatives from CRA International, the independent Auction Manager
- This presentation will be posted to the Auction Information Website

# Introduction

## Questions

---

### **2 ways to submit questions during the presentation – questions will be answered only after the prepared presentation**

- Send an email to [dpandl.auctionmanager@crai.com](mailto:dpandl.auctionmanager@crai.com) or
- Use operator assisted call-in number – 888-790-3725 – and audio passcode – 2628061
- Inform the operator you have a question by pressing \*1 at any time
  - Operator will place you into queue
  - Your position in queue will be noted, but you will be on mute and unable to ask your questions until prompted later following the prepared presentation

### **Following the prepared presentation**

- After questions sent via email are answered, the phone line will be opened for callers who use the call-in number
- Callers will be introduced using an assigned port number
- When asking a question, callers should NOT identify themselves

# Introduction

## Disclaimer

---

The Dayton Power and Light Company submitted an application for approval of an Electric Security Plan (ESP) to the Public Utilities Commission of Ohio (“PUCO”) on February 22, 2016, and subsequently amended on October 11, 2016, under case number 16-395-EL-SSO. A Stipulation and Recommendation was filed on January 30, 2017. The ESP was approved on October 20, 2017.

Today’s information session provides an overview of the process and deadlines in association with those competitive procurements.

This presentation is intended to provide only generally descriptive and summary information. The information and materials provided on the Auction Information Website and filed with the PUCO are controlling. Any conflict between the information conveyed during this bidder information session and information or material on the Auction Information Website, is unintentional.

Certain information may be subject to modification and approval by the PUCO.

On July 15, 2020 the PUCO issued a Finding and Order directing each EDU to modify the products in the upcoming Fall 2020 and Spring 2021 auctions. This is part of a broader plan set forth by the PUCO to modify the SSO procurement auction processes to mitigate the possible significant effects caused by recent uncertainty surrounding PJM’s base residual auction. The March 2021 auction product for DP&L will be modified (pending PUCO approval) to a 12-month product with a delivery period covering June 1, 2021 through May 31, 2022.

# Communications

---

**The central source of information is the Auction Information Website:**  
[www.dpandlpowerauctions.com](http://www.dpandlpowerauctions.com)

- Documents – Supplier Documents, Mark to Market Calculations, etc.
- Load Data
- Calendar
- Results – from previous CBP auctions
- News
- FAQ
- Ask – submit a question
- About – links to background information
- Registration – register to receive future notifications

## **Communications Protocols (on Information Website)**

- Promote a fair, open, transparent, objective, and non-discriminatory CBP
- Auction Manager is the communication point for prospective bidders
- Information is distributed and disseminated equally and fairly to all prospective bidders

CBP Timeline

Q&As

# Product Overview

---

## **Full requirements service for SSO Customers of the Dayton Power and Light Company includes:**

- Energy
- Capacity
- Market-based transmission services
- Market-based transmission ancillaries
- Any other LSE service or other service as may be required by PJM to serve the SSO Load of the Dayton Power and Light Company except those listed in the Master SSO Supply Agreement

## **Winning bidders will be responsible at their sole cost and expense for:**

- Any changes in PJM products and pricing during the contract term
- Any congestion costs incurred to supply their SSO share
- Remaining a member in good standing of PJM

## **Each SSO Supplier shall be responsible and liable to PJM for the performance of its LSE obligations associated with the provisions of SSO Supply**

# Product Overview

(continued)

---

## **SSO Suppliers will be obligated under the Master SSO Supply Agreement to**

- Deliver full requirements service of the slice of system of the Dayton Power and Light Company for purposes of meeting SSO Load
- Assume specified LSE obligations for purposes of PJM settlement

## **SSO Suppliers will not be obligated to provide**

- Distribution services
- Firm transmission service
- Applicable state renewable energy requirements

## **SSO Load will be divided into identical units called tranches**

- Each tranche represents one percent (1%) of the actual hourly energy required for SSO Load for the applicable Delivery Period as well as one percent (1%) of the PJM capacity requirement for the applicable Delivery Period
- Intent is to procure 48 tranches during the March 2021 auction

# Product Overview

(continued)

Table below shows the Peak Load Contribution for Standard Offer load.

Number of Tranches Per Delivery Period	Size of Tranche (%)	Energy Obligation	
		Peak Load Contribution (MW)	MW-Measure of Tranche
12-month: 48	1%	787	7.87

The energy obligation quantity is not necessarily indicative of the actual energy quantity to be delivered for each tranche because the amount of actual SSO Load during the Delivery Period will depend upon many factors, including but not limited to customer migration to CRES Suppliers and weather conditions.

Bidders are responsible for evaluating the uncertainty associated with supplying a wholesale energy tranche which could vary each hour from the nominal 7.87 MW of maximum hourly energy for the Delivery Period shown in the table. Please note that the figures in the above table exclude PIPP load.

These values are provided for reference purposes only and may be updated prior to the auction as explained in the Bidding Rules.

The Dayton Power and Light Company does not represent that each tranche will have the loads shown above or any particular MW value – the actual SSO Load during the Delivery Period will depend upon many factors.

# Product Overview

## Procurements

The following procurements are planned. Products are differentiated by the supply term associated with each supply contract. In the March 2021 procurement, there will be a 12-month Delivery Period product.

Auction	# Tranches to Procure	Load Cap	2017					2018					2019					2020					2021					2022					2023							
			1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12	1	2
Auction 1 (April 11, 2017)	16	40						12 month June 2017 - May 2018																																
	17							24 month June 2017 - May 2019																																
	17							36 month June 2017 - May 2020																																
Auction 2 (April 24, 2017)	16	40						12 month June 2017 - May 2018																																
	17							24 month June 2017 - May 2019																																
	17							36 month June 2017 - May 2020																																
Auction 3 (March 12, 2018)	16	26											24 month June 2018 - May 2020																											
	16												36 month June 2018 - May 2021																											
Auction 4 March 2019	17	27																24 month June 2019 - May 2021																						
	17																	36 month June 2019 - May 2022																						
Auction 5 March 2020	15	40																12 month June 2020 - May 2021																						
	15																	24 month June 2020 - May 2022																						
	20																	24 month *** June 2020 - May 2022																						
Auction 6 March 2021	14	38																					12 month June 2021 - May 2022					(These two products will be combined into a single 12-month product with 48 tranches.)												
	34																						12 month **** June 2021 - May 2022																	
Auction 7 March 2022	46	37																															12 month June 2022 - May 2023							

\*\*\* Due to the delayed BRA auction, the 36-month product in the March 2020 auction has been updated (pending PUCO approval) to a 24-month delivery period (ending May 2022). The additional 12 months will be auctioned at a later date.

\*\*\*\* Due to the delayed BRA auction, the 24-month product in the March 2021 auction has been updated (pending PUCO approval) to a 12-month delivery period (ending May 2022). The additional 12 months will be auctioned at a later date.

# Product Overview

## Minimum and Maximum Starting Prices

---

**Prior to the auction, the Auction Manager will announce a minimum and maximum starting price range for the auctioned product**

- As part of the application process, each Qualified Bidder submits an indicative offer based on the minimum and maximum starting prices which will be used to determine the bidder's initial eligibility in the auction

**The Auction Manager may determine that due to extraordinary events, the minimum or maximum starting price requires revision**

- If indicative offers have already been received, the Auction Manager will request that the Registered Bidders (or the Qualified Bidders if the Part 2 Application process has not been completed) modify their indicative offer on the basis of the revised minimum starting price and the revised maximum starting price
- Such an event also may require a revision to the schedule for the CBP auction

**No later than three (3) business days before bidding starts, the Auction Manager will inform Registered Bidders of the starting price for round 1**

# Qualification Process

## Overview

---

### **Part 1 Application: Prospective Bidders apply to become Qualified Bidders**

- Start Date: Friday, January 29, 2021
- Due Date: Thursday, February 11, 2021, 12:00 noon ET

### **Part 2 Application: Each Qualified Bidder provides certifications, its indicative offer, and pre-bid security in order to become a Registered Bidder**

- Start Date: Thursday, February 18, 2021
- Due Date: Thursday, March 4, 2021, 12:00 noon ET

**Only Registered Bidders can participate in the bidding**

**NOTE: Prospective bidders will be able to fill out, submit, and upload their supporting documentation for the Part 1 and Part 2 Applications electronically through the secure Online Application Website**

# Qualification Process

Part 1 Application – Due Thursday, February 11, 2021, 12:00 noon ET

---

**Submit an application from a person with the power to bind the bidder and agree to:**

- Comply with all rules of the auction
- If they become winning bidders, they will execute the Master SSO Supply Agreement with the Dayton Power and Light Company

**Show that they either satisfy the three requirements below, or have no existing impediments to satisfying all the requirements by the start of the supply period**

- Transmission Customer of PJM and have executed the applicable PJM Agreements
- Have PJM E-Accounts necessary to provide SSO Supply
- PJM Market Participant and a Load Serving Entity in PJM

**Agree that if they become winning bidders, they will comply with the creditworthiness requirements set forth in the Master SSO Supply Agreement**

**Certify that if they qualify to participate, they will not:**

- Disclose information regarding the list of Qualified Bidders
- Disclose confidential information about Qualified Bidders obtained during the bidding process
- Substitute another entity in their place
- Transfer their rights to another entity
- Otherwise assign their status as Qualified Bidders to another entity

# Qualification Process

## Part 1 Application (continued)

---

**A prospective bidder that has qualified during the Part 1 Application process becomes a Qualified Bidder**

**Auction Manager will send a list of all Qualified Bidders to relevant parties that have undertaken to maintain the confidentiality of the list of Qualified Bidders – relevant parties that will receive this list of Qualified Bidders are:**

- Each Qualified Bidder
- Other parties as necessary to oversee the proper conduct of the auction, including representatives from the Dayton Power and Light Company, PUCO Staff, and the advisor that PUCO Staff has retained for this purpose

**All parties receiving a list of Qualified Bidders will be subject to the confidentiality requirements as specified in the Bidding Rules and in the Communications Protocols**

**Part 1 Applicants must also submit financial information and Draft Pre-Bid Letter of Credit, Draft Letter of Intent, and/or Draft Letter of Reference (described later)**

**Prospective bidders will be notified by the Auction Manager no later than three (3) business days after the Part 1 Application Due Date whether they succeeded in becoming a Qualified Bidder**

# Qualification Process

## Part 1 Application (continued)

---

### **Part 1 Applications can be submitted online**

- The Part 1 Application process opens on Friday, January 29, 2021
- Due Date: Thursday, February 11, 2021, 12:00 noon ET

### **Applicants must submit a new Part 1 Application at least once per year to participate in the CBP auctions**

- All applicants that wish to participate in the March 2021 CBP auction must complete a new Part 1 Application

**In order to get an Application Online Account, prospective bidders must fill out an Account Request Form and email it to [dpandl.auctionmanager@crai.com](mailto:dpandl.auctionmanager@crai.com)**

**Account Request Form is available on Information Website [www.dpandlpowerauctions.com](http://www.dpandlpowerauctions.com) on the Home page under “Forms”**

# Qualification Process

## Part 1 Application – Account Request Form

### Account Request Form:

The Dayton Power and Light Company's Competitive Bidding Process

**Account Request Form: Request for Part 1 and Part 2 Application Online Account**

With access to an Online Account for the Part 1 Application and Part 2 Application process, a prospective bidder will be able to submit and check the status of their Part 1 Application and Part 2 Application as well as upload supporting documentation.

To open an Online Account please fill in the following information:

**Company Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_  
MM/DD/YYYY

Please provide the First Name, Last Name, and E-mail Address for every person that you request to be given access to your online Application. Each person listed below will receive a unique username and password combination that they will be able to use to login to the online application of the Company named above.

# Qualification Process

Part 2 Application – Due Thursday, March 4, 2021, 12:00 noon ET

---

**Qualified Bidders from the Part 1 Application process submit a Part 2 Application to become Registered Bidders**

**Part 2 Applications can be submitted online**

- The Part 2 Application process opens on Thursday, February 18, 2021
- Due Date: Thursday, March 4, 2021, 12:00 noon ET

**In the Part 2 Application, each Qualified Bidder will make a number of certifications regarding associations to ensure that they are participating independently of other Qualified Bidders and to ensure the confidentiality of information regarding the auction**

**A Qualified Bidder is associated with another Qualified Bidder if the two bidders have ties that could allow them to act in concert or that could prevent them from competing actively against each other**

# Qualification Process

## Part 2 Application (continued)

**With its Part 2 Application, a Qualified Bidder will be required to submit an indicative offer – two (2) numbers of tranches for the product in the auction – and to post pre-bid security sufficient for this indicative offer.**

- First number is the number of tranches that the Qualified Bidder is willing to serve at the minimum starting price for the product in the auction
- Second number is the number of tranches that the Qualified Bidder is willing to serve at the maximum starting price for the product in the auction
- At the minimum and the maximum starting prices, the number of tranches indicated by the Qualified Bidder cannot exceed the Qualified Bidder's credit-based and/or load tranche caps (described later)

### **Bidder's initial eligibility**

- This is the maximum total number of tranches the Qualified Bidder can bid in round 1 of the auction and may be subject to a load cap
- Determined by the number of tranches in the Qualified Bidder's indicative offer at the maximum starting price
- Thus, the indicative offer at the maximum starting price needs to state the maximum possible number of tranches that the bidder would be ready, willing, and able to serve

**Qualified Bidders will be notified by the Auction Manager no later than three (3) business days after the Part 2 Application Due Date whether they succeeded in becoming Registered Bidders**

Q&As

# Credit Provisions

## Required Credit and Financial Information

---

### For bidder or bidder's Guarantor:

- **Financial statements** (most recently issued SEC Form 10-K, 10-Q, 8-K)
- **A statement of rulings or judgments** relating to financial status that have had a material impact on financial status
- **A debt rating** from at least one of the following rating agencies: S&P, Fitch, or Moody's (with supporting documentation) – tranche limits apply to potential participants that are not rated
- **Contact information** for the bidder's/Guarantor's credit representative to answer questions on the documentation provided

# Credit Provisions

## Credit-Based and Load Tranche Caps

---

**These tranche caps limit the bidder's initial eligibility – i.e., maximum number of tranches the Qualified Bidder is allowed to bid on in round 1**

**Credit-Based tranche cap is based on the credit rating of the Qualified Bidder or its Guarantor – Qualified Bidder or Guarantor must:**

- Be rated by at least one of the following rating agencies: Standard & Poor's Rating Services ("S&P"), Moody's Investors Service, Inc. ("Moody's"), or Fitch, Inc. ("Fitch")
- For a Qualified Bidder not rated by any of the rating agencies, the credit-based tranche cap is 5 tranches

**Load cap will be 80 percent of the tranches offered in the auction**

- Load cap = 38 tranches (tranche target = 48 tranches) for the auction
- No bidder may bid on and win more tranches than the load cap
- The load cap is enforced by ensuring that each bidder's initial eligibility does not exceed the load cap in an auction
- No two or more associated bidders may bid on and win more tranches than the load cap

# Credit Provisions

## Pre-Bid Security – 3 Options

---

### 1) Seek an unsecured line of credit by relying on bidder's own financial standing

- Part 1: Submit a Draft Pre-Bid Letter of Credit (LOC)
- Part 2: Submit an executed Pre-Bid LOC or cash deposit (\$250,000/tranche)

### 2) Seek an unsecured line of credit by relying on Guarantor's financial standing

- Part 1: Submit a Draft Pre-Bid LOC and a Draft Letter of Intent to Provide a Guaranty
- Part 2: Submit an executed Pre-Bid LOC or cash deposit (\$250,000/tranche); and Submit a Letter of Intent to Provide a Guaranty (\$500,000/tranche)

### 3) Not qualified or elect not to apply for an unsecured line of credit

- Part 1: Submit a Draft Pre-Bid LOC and Draft Letter of Reference
- Part 2: Submit an executed Pre-Bid LOC or cash deposit (\$250,000/tranche); and Submit a Letter of Reference (\$500,000/tranche)

# Credit Provisions

## Master SSO Supply Agreement – Key Elements of Credit Provisions

---

### **Security posted during the term of the SSO Delivery Period will depend upon a creditworthiness evaluation**

- Unsecured credit may be granted based on the bidder's (or its Guarantor's) Net Worth and credit rating (see Articles 6.4 and 6.6 of Master SSO Supply Agreement)
  - The Dayton Power and Light Company reserves the right to apply any unsecured credit limits across associated bidders in cases where multiple associated parties seek to participate as independent bidders
- Total Exposure Amount less any unsecured credit (Margin) must be met with cash or Letter of Credit (Attachment E of Master SSO Supply Agreement)
- Margin could be met with either cash or Letter of Credit

### **Independent Credit Requirement (ICR)**

- **\$100,000** per tranche for 12-month product
- ICR declines over the term of the Master SSO Supply Agreement

### **Guaranty (Appendix D of Master SSO Supply Agreement)**

### **Letter of Credit (Appendix E of Master SSO Supply Agreement)**

PJM Items

Bidding Format

CBP Timeline

Q&As

# Bidding Format

## Reservation Price and Starting Price

---

### **There is a reservation price for the auctioned product**

- No tranche will be procured at a price that is above the reservation price
- Reservation price will not be disclosed to bidders

### **Starting price = announced price for round 1**

- Announced no later than three (3) business days before bidding starts
- No lower than the minimum starting price; no higher than the maximum starting price
- Starting price  $\geq$  reservation price

# Bidding Format

## Discretion to Reduce Tranche Target

---

### Discretion to reduce tranche target (# tranches to procure)

- If there is insufficient supply bid for the tranches to ensure competitive bidding, Auction Manager may reduce the tranche target
  - The criteria that could lead to such a reduction will be determined prior to the auction but will not be announced
  - Once certain pre-specified criteria related to excess supply and related to the reservation price have been met, the discretion to reduce the tranche target will be eliminated and there will be no reduction in the tranche target
  - Use of this discretion would be more likely in the earlier rounds of the auction
- If the Auction Manager reduces the tranche target for the auction, bidders will be informed of the revised tranche target

# Bidding Format

## Bidder's Eligibility

---

### **Bidder's eligibility**

- This is the maximum number of tranches the bidder can bid in a round
- Bidder's eligibility for a round is the total number of tranches the bidder bid in the preceding round
- Thus, bidder's eligibility cannot increase during auction – only stays the same or declines

# Bidding Format

## 2-Phase Auction Format

---

### Bidders bid using Auction Manager's Bidding Website

#### The auction will include 2 phases:

- A Clock Phase: During the clock phase the Auction Manager will announce the price prior to each round and each bidder will bid the number of tranches it would supply at that announced price.
- A Sealed-Bid Phase: At some point during the Clock Phase, a Transition Rule based on excess supply may move the auction to the Sealed-Bid Phase. The Sealed-Bid Phase comprises a single round of bidding. Bidders participating in the Sealed-Bid Phase will submit their best and final prices for tranches they bid in the next-to-last round of the Clock Phase that they did not bid in the last round of the Clock Phase.

# Bidding Format

## Clock Phase - Overview

---

### **Multiple-round, single-product, descending-price clock format**

- Each round has specified start and end times
- The price is announced prior to each round – the announced price falls round to round
- When a round opens, each bidder submits the number of tranches it is willing to supply at the product's announced price
- After round closes, rules determine whether
  - To continue with next round in the descending-price Clock Phase
  - To transition to Sealed-Bid Phase
  - Auction closing criteria have been met
- Round results are reported prior to the start of next round

# Bidding Format

## Excess Supply and the Transition to the Sealed-Bid Phase

---

**At the end of each round of the Clock Phase, rules determine how to proceed**

**Excess supply = (# of tranches bid) – (tranche target)**

- 1) If excess supply = 0:** The auction will close and the winning price will equal the last announced price. There will be no Sealed-Bid Phase.
- 2) If excess supply > 0:** Price for the product is reduced by a price decrement and the auction will continue with the next round in the Clock Phase.
- 3) If excess supply < 0 and only one bidder reduced the number of tranches it bid:** The auction will close with winning tranches comprising tranches bid in the last round (to be paid the announced price in that round) as well as a sufficient number of the reduced tranches by the bidder (to be paid the announced price in the next-to-last round) to meet the tranche target.
- 4) If excess supply < 0 and two or more bidders reduced the number of tranches they bid:** The auction will advance to the Sealed-Bid Phase.
- 5) If excess supply < 0 and no bidders reduced the number of tranches they bid:** This can occur only in round 1 of the auction. The Auction Manager may consider a tranche target reduction consistent with pre-specified criteria or the auction may close.

# Bidding Format

## The Sealed-Bid Phase

---

**Bidders who reduced their tranches bid from the next-to-last round to the last round of the Clock Phase will submit their best and final prices for those reduced tranches**

### **The sealed-bid round bids**

- 1) Bidders participating in the sealed-bid round will specify a price for each tranche of sealed-bid round eligibility. A bidder may bid a separate price for each tranche.
- 2) For each tranche bid in the sealed-bid round, the bidder may not specify a price above the lowest announced price that the bidder bid on the tranche during the Clock Phase. This price is the announced price that was in effect in the next-to-last round of the Clock Phase.

# Bidding Format

## Default Bid

---

### Default bid for a bidder: The Clock Phase

- If bidder entered round with positive eligibility but fails to submit a confirmed bid in the round, then a default bid will be submitted on behalf of the bidder
- The default bid will be zero (0) tranches – because the announced price decreased from the prior round
- A bidder with zero (0) tranches bid will not be able to submit any more bids in the Clock Phase

### Default bid for a bidder: The Sealed-Bid Phase

- If bidder is required to bid in the Sealed-Bid Phase of the auction and fails to submit a confirmed bid, then a default bid will be submitted on behalf of the bidder
- The default bid for each tranche that needs to be bid in the sealed-bid round will be the announced price that was in effect in the next-to-last round of the Clock Phase

# Bidding Format

## Winning Tranches, Bidders, and Prices – Three Cases

---

### **Case 1: If auction concluded in Clock Phase with Excess Supply = 0**

- There will be no Sealed-Bid Phase and winning bidders will be determined based on the Clock Phase alone
- Winning tranches are the tranches bid in the last round of the Clock Phase
- Winning bidders are the bidders who bid those tranches
- Price to be paid for winning tranches will be the announced price for the last round of the Clock Phase

### **Case 2: If auction concluded in Clock Phase with Excess Supply < 0 AND only one bidder reduced the # of tranches it bid**

- There will be no Sealed-Bid Phase and winning bidders will be determined based on the Clock Phase alone
- All tranches bid in the last round of the Clock Phase are winning tranches
  - They are paid the announced price in that round
- Some of the tranches reduced by the bidder are winning tranches
  - Enough so that # of winning tranches in total = tranche target
  - The reduced tranches that are winning tranches are paid the announced price in the next-to-last round of the Clock Phase (the last time the bidder bid the tranches)

# Bidding Format

## Winning Tranches, Bidders, and Prices – Three Cases (*continued*)

---

### Case 3: If auction proceeded to Sealed-Bid Phase

- All tranches bid in the last round of the Clock Phase are winning tranches
  - They are paid the announced price in that round
- Winning tranches bid in the Sealed-Bid Phase will be determined based on their rank order
  - Lowest-priced tranches are selected first until the tranche target is fully subscribed
  - If a tie-breaker is needed, random numbers are assigned to tranches bid at the same price, and those tranches with the lowest random numbers are selected as winning tranches
  - Winning tranches in the Sealed-Bid Phase are paid the price they were bid at in the Sealed-Bid Phase

**NOTE: A tranche can be a winning tranche only if its price  $\leq$  reservation price**

# Bidding Format

## Illustrative Example – Single Product

Illustrative Bidding in the Clock Phase							
Round	Tranche Target	Announced Price (\$/MWh)	Number of Tranches Bid				
			BidderA	BidderB	BidderC	BidderD	Total
1	100	\$66.00	20	52	10	45	127
2	100	\$62.00	15	48	0	44	107
3	100	\$59.50	0	48	—	42	90

Excess supply < 0 in round 3, so that is the last round of the Clock Phase.

In round 3, only 90 tranches of supply were bid against 100 tranches being procured – all 90 tranches are winning tranches.

10 of the 17 tranches to be bid in the sealed-bid round will be winning.

**BidderA:** Bid 15 tranches at \$62.00/MWh in round 2 and 0 tranches at \$59.50/MWh in round 3. Because BidderA reduced the tranches it bid by 15 tranches, it is required to bid 15 tranches in the Sealed-Bid Phase at prices no higher than \$62.00/MWh.

**BidderB:** Bid 48 tranches in rounds 2 and 3. Because BidderB did not reduce the tranches it bid, it does not participate in the Sealed-Bid Phase. BidderB wins 48 tranches at \$59.50/MWh.

**BidderC:** Bid 0 tranches at \$62.00/MWh in round 2 and is not eligible to participate in the Sealed-Bid Phase and does not win any tranches.

**BidderD:** Bid 44 tranches at \$62.00/MWh in round 2 and 42 tranches at \$59.50/MWh in round 3. BidderD wins 42 tranches at \$59.50/MWh and is required to bid 2 tranches in the Sealed-Bid Phase at prices no higher than \$62.00/MWh.

# Bidding Format

## Close of the Auction

---

### **Shortly after the last round of the auction, results are determined by the Auction Manager, then:**

- Auction Manager informs bidders through the Bidding Website if the reservation price has been met or not
- Auction Manager provides the Dayton Power and Light Company and the PUCO with the identity of winning bidders, the number of tranches won by each winning bidder, and the prices for the tranches won
- Auction Manager notifies:
  - Each winning bidder of how many tranches the bidder has won and at what prices
  - Each unsuccessful bidder that the bidder has not won any tranches
- The PUCO will have 48 hours after the conclusion of the auction to determine if there has been a violation of the CBP bidding rules in such a manner as to invalidate the auction based upon an assessment from CRA and an assessment from the PUCO's consultant

### **The Dayton Power and Light Company and winning bidders will execute the Master SSO Supply Agreement**

# Bidding Format

## Contingency Plan

---

### Contingency Plan (see Section 11 of the Bidding Rules)

- If fewer tranches than the tranche target are purchased in the auction
- If a winning bidder defaults prior to or during the SSO Delivery Period
  - If all tranches are not fully subscribed after the auction, the remaining tranches will be offered to current DP&L SSO Suppliers
    - These suppliers will have won tranches in the current or a prior DP&L CBP auction
  - An SSO Supplier will be considered a current SSO Supplier from the conclusion of the CBP auction in which such supplier won tranches until the termination of the prevailing Master SSO Supply Agreement
  - If, after the conclusion of the steps above used to assign unfilled tranches there still are unfilled tranches, then the necessary SSO supply requirements will be met through PJM-administered markets at prevailing Day-Ahead, Real-Time zonal spot prices

# Bidding Format

## Technical Difficulties During the Auction

---

Unforeseen technical difficulties may happen during an online auction

Pursuant to the auction rules, if a technical difficulty occurs during the auction, depending on the circumstances the Auction Manager will:

- Inform all the bidders as soon as possible, by phone and/or Auction Manager Message page on the Bidding Website
- Accept bids using the Backup Bidding Fax Number
- Extend the duration of bidding round(s), extend the time between bidding round(s), or otherwise pause the auction
